

**11 NIGHT BOTSWANA KAYAKING AND TENTED CAMP SAFARI  
OKAVANGO DELTA, PRIVATE KHWAI RESERVE AND SAVUTE  
A VERY UNIQUE ADVENTURE!**

Kayaking is an adventurous way to go on safari and enjoy the wilderness of Botswana. It is for people who have an active approach to their holiday and who enjoy nature and wildlife. The kayak expeditions take you paddling through the most pristine and beautiful areas of the Okavango Delta with little impact on the wildlife and environment around.

You will be camping in 2 x 2m dome tents which can sleep two guests comfortably with duvet and pillow and all food and camping equipment is provided including bucket showers.

A reasonable level of fitness is required for this safari as the safari covers about 40km per day in sometimes in challenging conditions.

*Stretching from the Linyanti River all the way to Savute Marsh, the winding waterways of the Savute Channel have pumped life into the western section of Chobe National Park for many thousands of generations. However, this fickle and unpredictable channel, which has a fascinating history of flooding and drying up, independently of good rainy seasons and flood levels elsewhere, has mystified local inhabitants, geologists and others for many years.*

*Savute Safari Lodge accommodates just twenty four guests in eleven thatched chalets built of local timber and one family room which consists of two double bedrooms. The chalets, which have been elegantly furnished in calm neutral tones to blend with the natural environment, feature expansive private decks, a combined bedroom and lounge area and en suite facilities.*

Many trips will incorporate a visit to the Savute Marsh to give you a chance to see the historic presence of the Savute Channel at the marsh against a backdrop of teeming wildlife. Guests can also enjoy a visit to the ancient San rock paintings at Gubatsa Hills – a small hilly outcrop which forms a prominent landmark in the otherwise flat landscape.*

*Savute boasts the second-largest summer Zebra migration in Africa; its timing is determined by the rains, but usually occurs between November and December and again between February and April, when the*

*Zebras move from the rivers in the north in search of the rain-ripe grasslands and full waterholes in the southwest of the park. The migration is always followed by large numbers of predators – the Zebra migration is a must for visitors.*
